26th Annual NAPN Conference - Standing Together

Texas Participants: Please note this conference will take the place of the annual conference the Correctional Management Institute of Texas normally provides in June.
Challenging, validating, and sharing; struggling with common dilemmas; discovering new solutions; articulating theories; enlightening, guiding and supporting: These are the goals for presentations on laws and policy; juvenile justice, assessment & treatment, probation, community supervision & care. Particularly timely are strategies for maximizing services with scarce resources, use of risk assessment and typology research in policy and treatment planning, sibling relationships, transitions into adult independence for emancipating youth, neurological and psychiatric interventions, community safety.

About the Conference……

Since the early 1980’s, providers serving sexually abusive children and adolescents have shared information through the National Adolescent Perpetration Network (NAPN). The NAPN conference continues to provide a forum for sharing information and resources, as well as an opportunity to connect with and support our colleagues in working with the troubled and troubling youth who perpetrate sexual abuse.

In 2005, the 20th NAPN conference in Denver celebrated the network’s ‘coming of age’, celebrated the pioneers of the field, and rolled out juvenile models for treatment of sexually abusive youth which were very different from the modified adult programs the field started with in the 1980’s. Good news abounded in discoveries from research that informed a more comprehensive holistic understanding of the functioning of youth. With the intervening economic stresses, it becomes increasingly important to maximize the effective use of scarce resources and to advocate for successful strategies in our communities.

“Standing Together” will bring together diverse, multidisciplinary professionals, who deal with sexually abusive youth in a variety of roles and settings, to explore the implications of research and clinical experience specifically relevant to juveniles. By addressing factors that decrease the risks of sexual deviance and abusive dynamics while increasing the opportunity for healthy relationships and successful outcomes, treatment is likely to achieve results far beyond the initial goals of containment and risk management.

With 300 days of sunshine a year, San Antonio is an ideal destination year round. The daily average temperature in April is a high of 78 degrees and a minimum of 57 degrees. San Antonio is the ideal blend of Texas history and a cosmopolitan city. The Omni San Antonio Hotel at the Colonnade is alive with the spirit of Texas. This four-diamond, luxury hotel captures the essence of the city with impeccable service and charm. Overlooking the rolling Texas Hill Country, this 19-story high-rise is close to the area’s most exciting sites and attractions such as the historic Alamo, Sea World San Antonio and the enchanting Riverwalk. A visit to San Antonio can also be just plain fun for those who might like to tack on a little vacation time. NAPN 2011 will provide a safe haven as we come together to share and renew our commitment to the prevention of sexual abuse.

More than ever before, the need for continuing education is clear as we share news from research, case management and clinical practice to bring the most up to date services to the youth we treat and work to prevent others from beginning to perpetrate sexual abuse. New information is changing what we need to know and do in practice and the annual NAPN conference is all about sharing!

Plan now to come join us in San Antonio, Texas!

*******************************************

Note:  It is the policy of NAPN to avoid labeling youth as if their behavior defines who they are.  This challenges us to avoid terms such as ‘sex offender’ in the clinical and care-giving contexts.  Therefore, some workshop titles have been edited for language.
